Special Notes

providers for advice.

CAUTION

Battery information
 A rechargeable battery has a long service life if treated properly. -A new battery or one

that has not been used for a long period of time could have reduced capacity the first few times it is used. Do not expose the battery to extreme temperatures, never above 50° C (122°F) or-10°C (below 14°F).

50°C (122°F) 0°-10°C (below 14°F).
 For maximum battery capacity use the battery at room temperature.
 If the battery is used in low temperatures, the battery capacity will be reduced. The battery can only be charged in temperatures between 10°C (50°F) and 40°C (104°F).
 RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DIS-

Removal or waste parteries and accumulators
 (Product with embedded battery ONLY)

 In case this product contains a battery incorporated within the product which cannot be readily removed by end users, SHARP recommends that only qualified professionals remove the battery, either for replacement or for recycling at the end of this product's working life. To prevent damage to the product, and for their own safety, users should

not attempt to remove the battery and should contact authorized independent service

Internal lithium battery in the unit should not be replaced by end users due to danger of explosion if battery is incorrectly replaced and must be replaced with the exact type

۲

The following accessories are included.

Approved accessories

The use of accessories not approved by SHARP, including but not limited to batteries, antennas, wall adapters, car chargers, ear gels and foam tips and convertible covers, may cause your SHARP device to malfunction or in the case of non-approved electrical accessories may cause the device to exceed RF energy exposure guidelines. Use of non-approved accessories will void your device's warranty.

Electromagnetic interference

Nearly every electronic device is susceptible to electromagnetic interference (EMI) if inadequately shielded, electromagnetic configured for electromagnetic compatibility. Similar to a mobile phone, this unit is a low power transmitter / receiver and is covered by regulations pertaining to such devices. Turn off this unit in any facility where posted notices instruct you to do so. These facilities may include hospitals or health care facilities that may be using equipment that is sensitive to external RF energy.

- When instructed to do so, turn off this unit when on board an aircraft. Any use
 of a mobile device must be in accordance with applicable laws, regulations
 and airline crew instructions.
- Some *Bluetooth* devices may interfere with some hearing aids. In the event
 of such interference, you may want to consult your hearing aid manufacturer
 or physician to discuss alternatives.
- If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your doctor or physician may be able to assist you in obtaining this information.
- If you are in doubt about whether this unit be safely turned on or used, please consult an authorized person in the location you want to use it. If no authorized person is available or you remain uncertain, SHARP recommends that you turn off your *Bluetooth* device and any mobile phones unless they are required in an emergency situation.

E-2

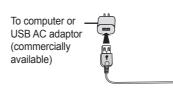

Charging the speaker

1. Open the micro USB charging terminal cover and then connect the micro USB charging cable.

2. Plug the other end of micro USB charging cable into a computer or USB AC adaptor (5V 500mA and above) that is power on.

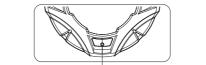

Note:

When playing the music while charging, please put the volume to a moderate level, otherwise the charger might be unable to afford high current under maximum volume.

Charging Indication:

| Power/ <i>Bluetooth</i> Indicator | Red | Turns off |
|--------------------------------------|----------|---------------|
| Battery status | Charging | Fully charged |

Power / Bluetooth indication

Cautions:

- At extremely high or low temperatures, the battery may not be fully charged.
 To maintain functionality, the device needs to be charged at least once every six months.
- Battery of the device has limited life, as with any other rechargeable batteries.
 Capacity may gradually be decreased over time of which extent may vary
- depending on the conditions of use and external environment.
 There are multiple factors such as volume level, external environment, etc. that may affect the time of device power turning off, other than the percentage of battery left.
- Use this product only with an agency approved power supply which meets local regulatory requirements (e.g., UL, CSA).
- The equipment shall be connected only to a power supply with limited power source.

E-6

Precautions

Listening to *Bluetooth* enabled devices

Bluetooth

Bluetooth wireless technology is a short-range radio technology that enables wireless communication between various types of digital devices, such as mobile phone or computer. It operates within a range of about 30 feet (10 meters) without the hassle of having to use cables to connect these devices.

Notes when using unit with a mobile phone

*Please refer to the operating manual supplied with the mobile phone for details on operation of your mobile phone while transmitting the sound using a *Bluetooth* connection.

Pairing Bluetooth devices

1. Place the device to be paired within 3 meters of each other when pairing.

- 2. Press and hold the (1) button to turn the power on. The Power/Bluetooth indicator will blink blue. The speaker is now in pairing mode and is ready to be paired with other Bluetooth source device.
- Perform pairing procedure on the source device to detect this speaker. " GX-BP1 SHARP" will appear in the detected devices list (if available) in the source device. (Refer the source device operating manual for details).

4. Select "GX-BP1 SHARP" from the source list.

5. Power/*Bluetooth* indicator (blue) will stop blinking once the speaker is successfully paired with the source device.

E-8

6. Press the not button to start Bluetooth streaming playback.

Call functions

Bluetooth

You can receive a call through this speaker when :

- it is connected to a mobile device such as a smartphone via Bluetooth.

E-5

| About call operation | | |
|-------------------------------|------------------------------|--|
| Function | Operation | |
| Answer a call | Press the 🔊 button. | |
| End a call | Press the 🔊 button. | |
| Decline an incoming call | Press and hold the N button. | |
| Redial the last called number | Press the N button twice. | |

Note:

Some mobile devices do not support the Call Function feature. Thus, this operation may not work.

E-9
