Sharp Washers deliver more than just a clean wash. Tough on stains, they are also gentle on clothes, washing all types of fabrics, from silk to children's clothes and from bedsheets to curtains, without damaging them.

Perfect Features For Perfect Washing Performance

Tub Cleaning

SS Drum

Smart Filter

Intelligent Water Fall System

Tub Cleaning Function

No Mould Buildup

With conventional washers, mould can build up behind the tub and get transferred to your clothes. Sharp Washers remove detergent and other residue behind the tub to keep the drum mould-free.

The Result:

No Mould Transfer

White Clothes Stay White

Safe And Allergy Free

Before

Tub-Cleaning Process

After

SS Drum

Gentle On All Fabrics

Unlike conventional drums with indented holes, Sharp washer drums have flat holes that prevent clothes from rubbing on the drum and damaging the fabric.

Sharp SS Drum

Conventional Drum

Intelligent Water Fall System

3-D Currents Dissolve Detergent Effectively

Strong 3-directional water flow increases the rate at which liquid or powder detergent dissolves. This reduces detergent residue on clothes that may cause skin irritation or allergy.

Reduces Detergent Residue On Clothes

Reduces Skin Allergy Caused By Undissolved Detergent

Conventional Washer undissolved detergent remains on clothes

Sharp Washer Detergent dissolves completely

Smart Filter

Lint-Free Clothes

Attached to the washer drum, the smart filter ensures better collection and filtering of lint during washing to keep clothes lint-free.

With Sharp Smart Filter

Without Filter

Soft-Close Tempered Glass

Tough But Closes Gently

Unlike conventional washing machines, ours has a tough tempered glass lid that closes gently using a hydraulic system.

Mirror Finished

Elegant And Functional

Mirror finish on both sides of the lid adds style to the washer while allowing the clothes being washed to be seen.

Other Features

S-Pulsator

The rotations create 3-dimensional water movements that remove dirt more effectively.

Fuzzy Control

Wash load and type of fabric is automatically measured and fuzzy logic selects the optimum wash programme from all setting and mode combinations for a consistent wash every time.

Soak Wash

This pre-wash process soaks clothes in a concentrated detergent solution for 20-30 minutes to loosen tough dirt particles.

Quick Wash

A complete wash cycle in a short time, perfect when you only have a few lightly soiled items that you need to wear in a hurry.

Auto Start After Blackout

Should there be a power failure, the washer memorises the washing setting and will resume washing using the said program setting when power is resumed.

Child Lock

Activate this safety function to prevent young children from disrupting the wash cycle.
