HYBRID COOLING SYSTEM

EVEN COOLING IN EVERY COMPARTMENT FOR FOOD FRESHNESS

Air from the refrigerator's compressor travels through this Hybrid Cooling System panel and cools quickly to radiate evenly into every compartment of the refrigerator. Ensuring an even distribution of cool air throughout. Water molecules that enter the refrigerator is turned into moisture to keep the food from drying out, and this feature prevents cold air from being blown directly onto food items, keeping them fresher for longer.

J-TECH INVERTER

SHARP J-Tech Inverter uses a 36-step controlled compressor that operates at a more precise temperature according to the usage of the refrigerator. This helps to reduce wastage of energy and save electricity.

J-TECH WITH 36 GRADUAL COOLING STEPS

The smaller cooling range from one point to another uses less energy and saves cost.

OTHER CONVENTIONAL INVERTER WITH 7 WIDE STEPS

The wider cooling range uses more energy to go from one point to another, which increases cost.

Multi Door Bottom Freezer

SJ-VX79E-SL

606L - Silver
WxHxD: 892x1830x771mm

Now: \$2,399
U.P: \$2,639

- J-Tech Inverter
- Anti-Bacterial Deodorizer
- Hybrid Cooling
- Extra Cool
- Express Freezing
- Smart Defrost System
- Wide Hybrid Panel
- Door Alarm

SJ-VX74E-SL

556L - Silver
WxHxD: 892x1720x771mm

Now: \$2,099
U.P: \$2,279

- J-Tech Inverter
- Anti-Bacterial Deodorizer
- Hybrid Cooling
- Extra Cool
- Express Freezing
- Smart Defrost System
- Wide Hybrid Panel
- Door Alarm

SJ-VX40PG-BK

401L - Black (Glass)
WxHxD: 795x1800x692mm

Now: \$1,599
U.P: \$1,899

- Plasmacluster Technology
- Inverter Compressor
- Super Freezing
- Holiday Mode
- ECO Energy Saving Mode Bottom Freezer

HYBRID COOLING SYSTEM

J-TECH INVERTER

HYBRID Cooling System not applicable for SJ-VX40PG-BK.

2 Door Mega Freezer

PLASMACLUSTER™ IONS

SHARP Plasmacluster™ Ion Technology is a world-renowned technology that has been proven to eliminate 99% airborne bacteria and 97% airborne mould in the refrigerator. Positive and negative ions are released and attached to the surfaces of mould and bacteria to form highly Oxidising Hydroxide (OH) radicals that removes hydrogen from surface proteins; breaking them down to form water molecules.

SJ-PG60P2

600L - Black/Dark Silver
WxHxD: 865x1870x740mm

Now: \$1,599
U.P: \$1,799
