Celebrating more than a century of Japanese innovations since 1912

Since its founding in 1912, SHARP has remained committed to producing products that are innovative and forward-looking. It is with this vision to make people's lives richer and more efficient that have brought the company to where it is today.

From just a small metalworking shop based in Tokyo, Japan, SHARP has expanded its business outreach across the globe with its two principle ideals of "Sincerity and Creativity" that have made its product well-received by people around the world.

Fast forward to more than a century later, the company is still staying true to its business philosophy that seeks to promote technological developments that contribute to the holistic growth of society.

AQUOS 8K

AQUOS 8K AI Revelation Engine

8.8 times more processing power^{*4}

Upconvert various content, such as television broadcasts, and 2K/Ultra HD content, to finer high resolution 8K video.

8K AI UPCONVERT

Broadly analyzes target pixels and surrounding information, and predicts the original shape of objects on screen. It reconstructs information that is easily lost during the upscaling process to create realistic video content.

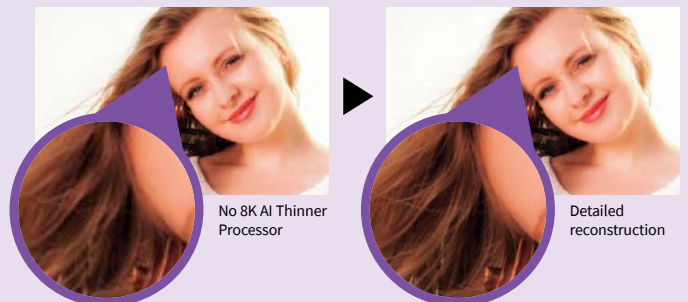

No 8K AI Upconvert

Realistic reconstruction

8K AI THINNER PROCESSOR

Analyzes low resolution videos and signals, predicts minute details in original objects, and reconstructs minute information to upscale images to 8K resolution, resulting in clear, high-definition videos.

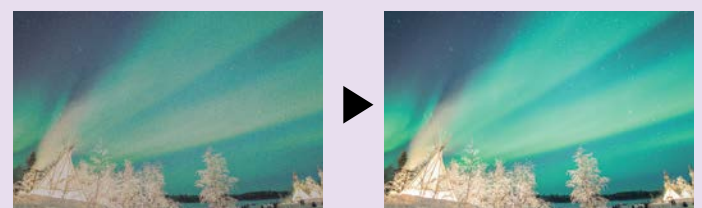

No 8K AI Thinner Processor

Detailed reconstruction

8K AI NOISE REDUCTION

Analyzes the components of video signal noise and performs dynamic noise reduction processing according to the video's characteristics to create clear and natural images with both reduced noise and accurate reconstruction.

No 8K AI Noise Reduction

8K AI Noise Reduction

AQUOS 4K

CAPTURES REAL DETAIL

Upconvert any video source (SD/HD/2K) to 4K video with contour and texture information of the video source kept intact. All your favourite past videos can be enjoyed to the best of its potential.

EX) With 2K source

4x

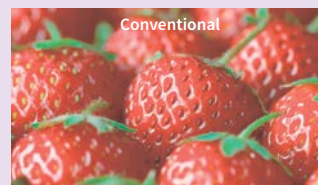

The amount of its data

3,840 x 2,160 pixels

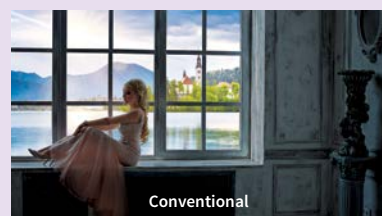

CAPTURES REAL COLOUR

Six axis colour management incorporates the complementary colour of magenta, yellow and cyan in addition to the three primary colours of red, green and blue. Subtle tones are depicted distinctly close to that of nature.

CAPTURES REAL CONTRAST

The image processing engine restores luminance information faithfully and displays images optimally on the liquid crystal panel. The feeling of depth in scenery and texture of material is reproduced with a realistic look and feel.

FIGHT BACTERIA AND VIRUSES WITH PLASMACLUSTER™

Plasmacluster™ ions are positive and negative ions that occur in nature.

SHARP's patented Plasmacluster™ Technology has been proven to improve air quality by greatly reducing bacteria and viruses through the Plasmacluster™ ions released from the air purifiers.

Plasmacluster™ ions can also improve the skin's elasticity and texture, keeping your skin smooth and moist.

Since the introduction in year 2000 of SHARP's first air purifiers equipped with Plasmacluster™ Technology, total sales of products equipped with this technology reached 80 million units worldwide at the end of year 2018.

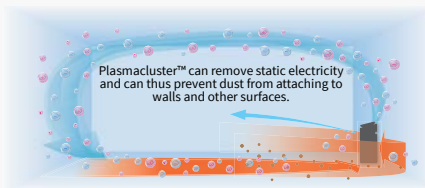

3-STEP AIR PURIFYING SYSTEM

- 1 REMOVE**
Plasmacluster™ Ions Can Remove Mold¹, Viruses², Allergens³, Odors⁴, and Static Electricity

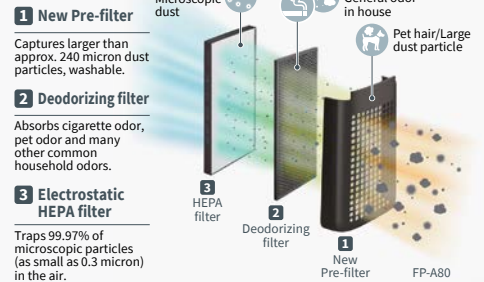

- 2 COLLECT**
Powerful Air Suction and Unique Airflow Quickly and Efficiently Collect Dust and Other Particles

Faster airflow at a 20° angle collects dust at lower levels in the room for more effective cleaning.

- 3 CAPTURE**
High-Performance Filters Capture Airborne Dust Particles

High-Performance Filters Capture Airborne Dust Particles.

¹ Airborne Mold • Tested by: Japan Food Research Laboratories Test method: Performance evaluation test according to voluntary standard HD-131 of the Japan Electrical Manufacturers' Association in a testing space of approx. 25 m³. • Object tested: One type of airborne mold. • Test result: 99% reduction in approx. 14 minutes, tested with a model in the same class as the FP-J60 operating at the High airflow setting.
² Airborne Viruses • Tested by: Pasteur Institute in Ho Chi Minh City, Vietnam • Test method: Performance evaluation test according to voluntary standard JEM 1467 of the Japan Electrical Manufacturers' Association in a testing space of approx. 25 m³. • Object tested: One type of airborne virus. • Test result: 99% reduction in approx. 9 minutes, tested with a model in the same class as the FP-J60 operating at the High airflow setting. 99% reduction in approx. 18 minutes, tested with a model in the same class as the FP-F30 operating at the High airflow setting.
³ Airborne Allergens from Dust Mite Feces and Remains • Tested by: ITEA Inc. • Test method: Allergens from dust mite feces and remains were suspended in the air in a testing space of approx. 25 m³ and measured using the ELISA method. • Test result: 99% reduction in approx. 14 minutes, tested with a model in the same class as the FP-J60 operating at the High airflow setting. 99% reduction in approx. 51 minutes, tested with a model in the same class as the FP-F30 operating at the High airflow setting.
⁴ Clinging Cigarette Odor • Tested by: Sharp • Test method: The effectiveness of deodorizing a cloth swatch impregnated with cigarette odor components was evaluated by using the six-level odor intensity indication method. • Test result: Deodorized to unnoticeable levels after approx. 55 minutes for a model in the same class as the FP-J60 and approx. 90 minutes for a model in the same class as the FP-F30.
⁵ Research conducted by University of Applied Sciences Aachen, Germany, Kitasato Research Centre of Environmental Sciences, Japan and Ishikawa Health Service Association, Japan.

¹ The mechanism of the mosquito catcher is studied in collaboration with the Institute for Medical Research, Malaysia.

² Result of 24-hour laboratory test in collaboration with the Institute for Medical Research, Malaysia, with Culex quinquefasciatus, Aedes albopictus and aegypti, and Musca domestica. The efficacy of the mosquito catcher function was tested in a laboratory setting; actual conditions may vary. Continuous usage will improve capture efficacy.

FRESHER FOR LONGER WITH PLASMACLUSTER™

PLASMACLUSTER™ ION*

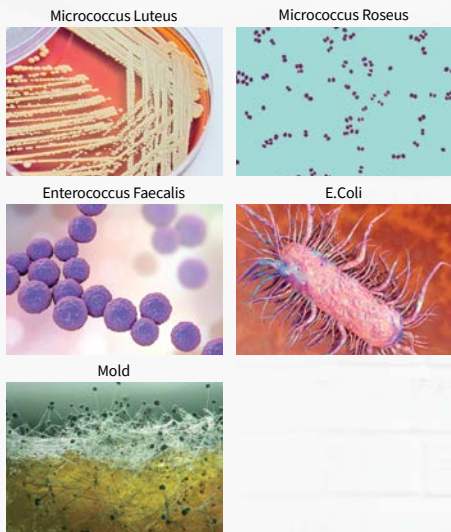

SHARP Plasmacluster™ Ion Technology is a world-renowned technology that has been proven to eliminate 99%^{*1} airborne bacteria and 97%^{*1} airborne mould in the refrigerator.

Positive and negative ions are released and attach to the surfaces of mould and bacteria to form highly Oxidising Hydroxide (OH) radicals that removes Hydrogen from surface proteins; breaking them down to form water molecules².

HOW PLASMACLUSTER™ ION TECHNOLOGY WORKS

FLEXI ROOM: MULTI-TEMPERATURE SETTING COMPARTMENT

PRE-SET TEMPERATURE SETTING

An isolated compartment that allows you to adjust the temperature to suit your purpose.

COOL DOWN MODE
Cool food items (<60°C) without affecting the overall refrigerator temperature

DEFROST MODE
Defrost frozen ingredients before cooking

EXTRA COOL MODE
Chill your drinks without freezing them

EXPRESS COOL MODE
Chill your food at the exact temperature

MANUAL TEMPERATURE SETTING

You may manually fix the temperature at the following permanent temperature settings: **DEEP FREEZING, SOFT FREEZING, CHILL, COOL**

*Selected models only

¹ Verified in Sharp test comparisons of ions not surrounded by water molecules.

² Research conducted by University of Applied Sciences Aachen, Germany, Kitasato Research Centre of Environmental Sciences, Japan and Ishikawa Health Service Association, Japan.

STYLISH DESIGN MEETS MEGA FREEZER

MEGA FREEZER FOR ALL YOUR NEEDS

Fit as much as your heart desires with Mega Freezer. With the space, you can store large containers and bulk purchases, allowing you to stock up on fresh frozen food with a peace of mind.

ALL THE BENEFITS WITH FREEZER ORGANISER[^]

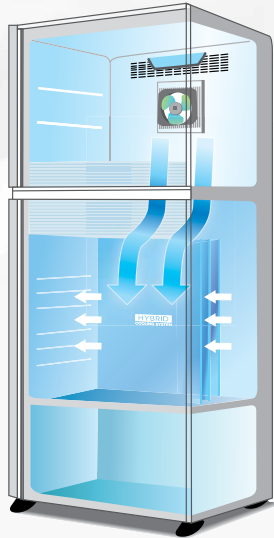

Bid goodbye to food contamination, frost bites and odour transfers with a designated compartment. Store your frozen meat and fresh produce apart, or keep raw frozen food away from cooked leftovers.

HYBRID COOLING SYSTEM[†]

HYBRID COOLING SYSTEM

EVEN COOLING IN EVERY COMPARTMENT FOR FOOD FRESHNESS

Air from the refrigerator's compressor travels through this Hybrid Cooling System panel and cools quickly to radiate evenly into every compartment of the refrigerator. Ensuring an even distribution of cool air throughout. Water molecules that enter the refrigerator is turned into moisture to keep the food from drying out, and this feature prevents cold air from being blown directly onto food items, keeping them fresher for longer.

INTELLIGENT COOLING SYSTEM

J-TECH INVERTER

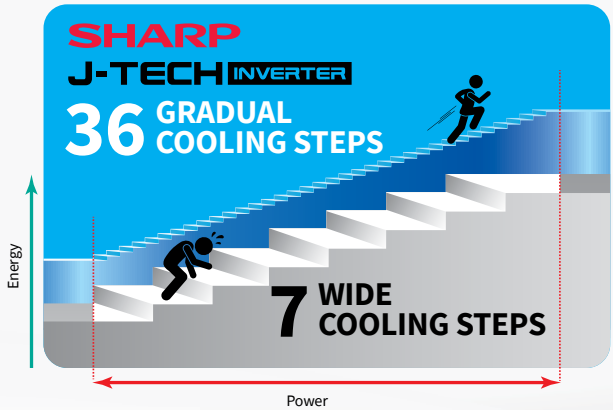

SHARP J-Tech Inverter uses a 36-step controlled compressor that operates at a more precise temperature according to the usage of the refrigerator. This helps to reduce wastage of energy and save electricity.

J-TECH WITH 36 GRADUAL COOLING STEPS

The smaller cooling range from one point to another uses less energy and saves cost.

OTHER CONVENTIONAL INVERTER WITH 7 WIDE STEPS

The wider cooling range uses more energy to go from one point to another, which increases costs.

WATER-SAVING

Water does not need to fill and flow into an outer tub, so you can **save up to 50% of water** at every wash.

HYGIENIC & HEALTHY

No mould or dirt can form behind SHARP'S No-Holes Tub, and flow back inside to stick to laundry, ensuring ultra-clean clothes.

GENTLER ON CLOTHES

SHARP'S No-Holes Tub has a completely smooth surface which **protects your clothes from being torn** as they will not be caught in any holes.

INTELLIGENT SENSORS

WATER PRESSURE SENSOR

Senses water pressure to save water at 'Rinse' cycle.

BLACK-OUT SENSOR

In the event of a power failure, the last process will be memorised.

LOAD SENSOR

Auto detects the amount of laundry.

IMBALANCE SENSOR

Ensures load is balanced when spinning starts.

WATER LEVEL SENSOR

Auto detects the water level.

LID OPEN / CLOSE SENSOR

Ensure top lid is not open or broken during the spinning process for safety reasons

NO-HOLES TUB SERIES

NO-HOLES TUB

Key Features

- No-Holes Tub Technology
- Up to 50% Water Saving
- Stainless Steel No-Holes Tub
- Gentle to Fabric
- Wide Tempered Glass Door
- Auto Self Clean Function

INVERTER PRECISE FREQUENCY CONTROL SYSTEM

This system integrates a hall sensor, frequency conversion motor and control chip that measures laundry load and type, effectively reducing noise and conserves energy.

Compared to Conventional washing machines, SHARP's smart washing machine can help you to save power, reduce water usage and lower noise. This inverter washing also helps to prevent allergies that occurs from mixing different laundry.

8 TIMES HIGHER HEATING POWER
THAN THAT OF CONVENTIONAL CONVECTION OVENS

ALL IN ONE COOKING FUNCTION

GRILL AND NON-FRIED

Oil-free and healthy!

Non-fried & Grilled Vegetables

BAKE

No worrying about overcooking!

Grilled Salmon with Vegetables

STIR FRY

Cook evenly like stir frying with a pan

Stir-fried chicken with cashew nuts

STEAM AND BOIL

Steam multiple dishes at once!

Steamed eggs and prawns with asparagus

AUTOMATIC COOKING WITH SUPERHEATED STEAM + TEMPERATURE SENSOR

Healsio fills the oven with superheated steam upon start and injects the steam directly into the ingredients.

More heat is automatically given to the lower temperature ingredients, allowing all ingredients that were kept at different temperature, to finish cooking at once.

Due to the characteristics of superheated steam, the lower the temperature, the more heat it gives.

The temperature sensor adjusts the heating time by determining the amount of ingredients from the temperature rise.

EASY USE AND CLEANING WITH STEAM TECHNOLOGY

Steam Cleaning Function: Wipe off surface dirt

Deodorising Coating: Prevents oil adhesion and odour

Stainless Steel Oven Capacity: Prevents rust

STEAM STERILISING*¹

Tableware, kitchenware or baby bottles can be sterilised with large amount of heated steam.

Tableware (heat-resistant temp. of more than 120°C)

Kitchenware (heat-resistant temp. of over 90°C)

*¹ Sterilisation function [Test institution] Kyoto Microbial Research Institute. [Test method] Method of measuring the number of viable bacteria. [Method of sterilisation] Method of removal by water vapour. [Test result] Sterilisation rate 99.0% or more. [Test subject] Tableware course steawan, kitchen utensils course seihobori. [Date and number of test report] Tableware course: H30.6.15 No. 8229. Kitchenware Course: H30.6.15 No.8232. However not all bacteria can be sterilised.
