** Filter life varies depending on the room environment, usage conditions, and location of the Main Unit.
 Lifespan of HEPA filter and Deodorizing filter and replacement suggestions are based on purifying a room in which 5 cigarettes are smoked per day and the Main Unit's dust collection and deodorizing performance has declined to half the level of a new filter.
 We recommend replacing the filter more frequently if the Main Unit is used in conditions significantly more severe (PM2.5, etc.) than a normal household.

Update: Mar2022
