Tips for "Grilled and Non-Fried Dishes"

Helpful Tips

<<How to Tell the Difference>> * When using the automatic cooking function, each dish will have a different cooking setting.

When You Want to Reduce the Amount of Oil Used
(Ex) Chicken with Teriyaki Sauce
○ Use either the Water Grill cooking setting or the Water Oven cooking setting without preheating.
○ Use the Superheated Steam setting on high to quickly reduce excess fat from the ingredients of the dish.

Deep Fried Chicken
(Ex) Deep Fried Chicken (Boneless Chicken Thigh)
○ Use the Water Oven cooking setting to efficiently reduce fat from the meat.

When You Want to Quickly Cook Something that is Raw
(Ex) Baked Sweet Potato
○ Use either the Water Grill cooking setting or the Water Oven cooking setting without preheating.
○ Use the Superheated Steam setting on high to speedily cook the dish all the way through.

Frying
(Ex) Croquettes, Fried Sardines
○ When raw ingredients give off water, use the regular oven function to cook in order to become sticky. (Do not use water)

Warning  ● "Tempura" cannot be fried in this oven.

Spring Rolls
(Ex) Spring Rolls

○ Coat the rolls all over with oil before cooking.

Important Points

→ Dishes can be cooked manually as you like.

→ We recommend lining the baking tray with aluminum foil or baking paper in order to make clean up easier.
   Be aware when lining the baking tray that your foil or paper does not stick out from the edges. When using the rack, use the legs to hold the aluminum foil or baking paper down.

“Frequently Asked Questions" about Frying

Q1. What does the "Non-Fried Cooking" do?

      ● "Tempura" cannot be fried in this oven.

Q2. Can you cook things coated in white panko breadcrumb?
   A. The ingredients which are coated with ready-made white breadcrumb cannot be cooked. Please use "the golden-brown breadcrumbs" explained on page 40. (Both ready-made white bread crumbs and vegetable oil cannot brown on top of the dish evenly.)

Q3. Can frozen items be cooked?
   A. ● When you cook from the seasoned frozen meat from your own kitchen, please refer to the recipe of Deep Fried Chicken (Boneless Chicken Thigh) on page 39.
      ● When you want to reheat the fried cooked foods from outside, CRISPY REHEAT (Operation Manual Page 34) is helpful.

Tips for “Grilled Fish”

Helpful Tips

Check the cooking instructions of each recipe if you need water or pre-heating or not. (When you see this mark ✉, it means to use water when cooking)

How to Tell the Difference *When using the automatic cooking function, each dish will have a different cooking setting.

Grilled Sauce & Miso Marinated Dishes

(Ex) Grilled Yellowtail with Teriyaki Sauce, Grilled Japanese Spanish Mackerel with Miso Marinade

- GRILL without preheating.
- If you use the WATER GRILL setting when cooking with these, the steam will thin the sauce/marinade. Thus, the GRILL setting is used (No water needed).

Salt-Grilled Dishes 🍛

- Use the WATER GRILL setting with preheat.

Important Tips

→ Dishes can be cooked manually as you like.

If the main goal is to produce a nice golden-brown color when done, and not reduce salt or oil content, cook using the Grill setting. By preheating the oven, the color will be even richer.

(No water needed)

→ Depending on fat content of the fish, the degree of brown will vary. If you want more brown color, then extend the cooking time for 4-5 minutes and keep an eye on it.

* Depending on the degree of freshness, the skin may break and the finished condition will vary.

→ Grilling Frozen fishes without Defrosting

For frozen Salt-Grilled Fish Fillets, Fish Fillets that are less than 150g*, and Sun-Dried Fish, they can be grilled as is. They are cooked by the same following the same instructions for raw fish. If the finished color isn’t satisfactory, simply extend the cooking time with the EXTEND function.

* For Frozen Fish, use the AUTO SENSOR COOK FROZEN INGREDIENTS GRILL Setting.

* Please see "How to Freeze Salt-Grilled Fish” on page 45 for more information on freezing.

→ We recommend lining the Baking tray with aluminum foil or baking paper in order to make cleanup easier.

* Be mindful when lining the Baking tray that your foil or paper does not stick out from the edges. When using the rack, use the legs to hold the aluminum foil or baking paper down.

→ What to do with other fillet not mentioned in this cook book:

Please read through the “Helpful Tips” section in order to look for the close grilled fish dish. Low-fat cuts of fish are best cooked with the Grill setting.

Sauce
- Soy Sauce ........................................ 2 Tbsp
- Sweet Rice Wine (Mirin) ......................... 1 Tbsp

1. Place the yellowtail in a sealed plastic bag, remove all of the air, and seal it closed. Turn it over about 2-3 times and then let it sit for about 30 minutes.

   <Important Point>
The reason why this is done is to assure that the sauce coats the fish completely. It also makes cleaning up easier.

2. Once the fish has been soaked, put some oil on the rack and place the fish cut-side up on it.

Variation
Cook four fillets (1 fillet = 80g) on the same setting.

Tips for Salt-Grilling Fish
- The final color will vary on the fat content of the fish. When cooking with a fish with low-fat content, coat both sides with a sugar-salt mixture.
- How to make a sugar-salt mixture: about 20% of the mixture should be sugar. The remainder 80% can be salt. Using this will increase the umami flavor and turn the fish a nice golden-brown color.
- The moisture pulled out by the salting will also start to bring out the smells of the fish, so use a paper towel to wipe it off.

Salt-Grilled Saury

Ingredients (Serves 4)
Saury
4 Fillets (1 Fillet = 150g)
Salt or a Sugar-Salt Mixture
(Please refer to the "Tips for Salt-Grilling Fish" point below).

5. When preheating is complete, put the Baking tray prepared in step 4 in the oven. Set the knob to 20-22 min and press START.

How to Freeze Salt-Grilled Fish
- Coat the fillet with salt, let sit for about 10 minutes, quickly rinse the fillets and then remove excess moisture. Let the fillets sit for 20 to 30 minutes after this to absorb the salt originally sprinkled on it. Finally, lay the fillets flat inside of a freezer bag taking care to make sure they do not overlap.
- Cook the frozen fishes with the same steps 3-5 above. If the fish aren’t golden brown enough, please extend the cooking time.
Tips for the "Steamed Dish / Simmered Dish"

Helpful Points for Steaming

→ For the Steam High setting, dishes can be cooked up to around 100°C using steam. Enjoy using this realistic steam cooking setting without the need for a steamer.

→ By letting the oven permeate with steam and reduce the oxygen content, food doesn't oxidize as much, allowing vegetables to maintain their important nutrients.

→ Items normally prohibited when using the microwave function can be used when steaming. Eggs can be left inside the shell and food in retort packaging can also be left inside. Vegetables can be steamed using the metal fine hole colander.

   Warning: Please do not try to boil eggs, cook retort packaged food, or use the metal accessories with the microwave function.

→ If the cooking times are the same, different dishes (vegetables & eggs, spaghetti & sauce) can be cooked at the same time with this oven, saving you time.

   Ex: Mimosa Salad (Page 47) & Spaghetti with Store-Bought Sauce (Page 57)

→ When cooking with the Steam setting, please refrain from opening the oven door as opening it will allow steam to escape and the dish may not cook all the way through.

Helpful Points for Simmering

→ Simmered dishes are cooked using the Superheated Steam setting. Use the Water Oven setting with a heat-resistant container and a lid (made of aluminum foil, etc.).

   (Refer to "Convection/Grill" on Page 29 of the Operation Manual)

   *It's easier to cook by using a metal bowl as pictured on the right.

   *In the event that an aluminum foil lid is being used, be sure to close the edges tightly.

   *When done, be careful when removing the lid (aluminum foil, etc.) as the steam may cause burns.

→ When cooking a dish that releases large amounts of juice, please use a deep, heat-resistant container to cook with to prevent the container from boiling over.

**Tips for Rice & Porridge**

- 1 Cup of rice is 200mL.
- When cooking rice and rice porridge with the microwave setting, use a microwave-safe, heat-resistant container and plastic wrap for the lid. (Please refer to page 29 of the operation manual).
- Use a dish that is double the amount of the rice and water combined to assure that it does not spill over.
**Noodles Set**

Reheat Spaghetti and sauce together with noodles and broth at the same time.

---

### Tips for Spaghetti & Sauce

- Use a store-bought container designed for boiling pasta noodles in the microwave. It should be approx. 27cm x 9cm x 6cm.
- When boiling spaghetti, vegetable oil is added to make the spaghetti noodles not stick together.
- By cooking the pasta in this oven, it will have a slightly less-chewy texture when done. Furthermore, the final product will vary based on the maker of the noodles and the size of the dish used to cook them in. If the noodles are too hard, extend the cooking time and keep an eye on it.

---

*Change It Up With Different Kinds of Noodles & Ingredients*

- Vegetables (Chinese cabbage sliced at a 45-degree angle, shimeji mushrooms broken into small bunches, etc.) can be cooked in the metal colander with the udon noodles.
- Soba buckwheat noodles can also be substituted in.
- When using frozen noodles, adjust the cooking time to roughly 25 minutes.

Tips for "Making Sweets"

● Prepare thoroughly
  - First, properly measure ingredients and arrange utensils.
  - Inconsistencies can occur when measuring flour with a measuring cup. Please measure with a scale.

● Make sure bowls and whisks are free of moisture and oil.
  - It makes beating eggs difficult.

Whipping eggs is manual work. It is convenient if you have a hand mixer.

● Froth will disappear if too much time passes after beating the eggs, so please work quickly.

WARNING Beating the whole egg and sugar together has less of a tendency to froth compared to beating only the white. Please be careful as mistakes easily arise when cooking with insufficient froth.

● Use butter with or without salt to your liking.

● Properly divide and sift weak and strong flours.
  - Lighten the baking by removing clumps and adding plenty of air to the dough.

● Arrange the dough with spaces in between.
  - They expand when heated, so make sure there is plenty of space. Enough space is necessary because the dough is more likely to expand with heating.

● For Baking
  - Cookies and cream puffs can result in uneven baking if the thickness of the dough is not consistent. Please make the sizes and quantities uniform.

● Results will vary on the quality of the materials.
  - Metal pans are mainly used in this cookbook. You may use paper or silicon pans, but please watch as you bake after confirming the heat-resistant temperature. (See operation manual page 29) Also, utensils made of heat-resist glass are slower to heat up when compared to those made of metal, which will yield different results.

● When using recipes not found in this book
  - When using recipes found in other books on the market, please cook while using a similar recipe from the cookbook menu as a reference. However, note that it may not be possible to cook under the same conditions found in other books, as the size and construction of the oven will differ, giving different heating times and temperatures.

Can automatically bake with 15cm or 21cm diameter.
Properly adjust settings for 15cm or 21cm diameter. Adjustments should be made within 30 seconds of setting to start cooking.

1. Apply a thin layer of butter (not from ingredients) on the inside of a circular pan and lay out a baking paper. Separate the egg whites from the yolk.

2. Put the egg whites in a large bowl, and beat until it forms a point. Slowly add half of the sugar and continue beating.
   **<Important Point>**
   The point is to have the egg whites & yolks beaten. Please do so about.

3. Add the the sugar to the yolks, and warm both with hot water. Remove when it reaches body temperature and beat until white and lines start to appear (mayonnaise consistency).

4. Combine the egg whites with the yolks, add vanilla extract, and mix with a whisk until smooth.

5. Sift cake flour into the step 4. Mix by lifting from the bottom gently not to damage the froth until the flour disappears.
   **<Important Point>**
   If it is not mixed well enough, the texture will be coarse. If it is mixed too much, it will not rise well.

6. Cut butter into small pieces and put in a heat-resistant container with milk. Place the plastic wrap on top of the container, and place in the center of the oven. (Do not insert either Baking tray).
   **<Important Point>**
   By pouring the content from an elevated position, the froth will become even.

7. After baking, use a spatula to add to the contents of step 5, and mix quickly.
   **<Important Point>**
   Butter will melt just above body temperature, between 50–60°C quickly dissolves in batter.

   **<Important Point>**
   When baking with the mode, superheated steam is added with precise timing, on the condition the tank is filled with water. When baking manually. No water is used.

9. Preheat the oven (Do not put the cooking accessories or food inside).

10. Pour contents from step 7 into the pan from step 2 and shake. After the surface is even, tap to get rid of air bubbles.
    **<Important Point>**
    It is done if no batter sticks after poking the center with a bamboo skewer.

11. When preheating is complete, add contents from 10 to the center of a Baking tray and press START.

12. To prevent a reduction in yield after baking, immediately lower the height of each pan 20–30cm. (It will finish nicer and the center won’t cave in). Remove from the pan with the bottom up, place on a net and cool.

13. Making whip cream. Put chilled whip cream and sugar in bowls. Beat while cooling each bowl, adding vanilla extract and brandy and beat more until the cream becomes thick.

14. Leave thin cuts of fruit to use as decoration. Cut the sponge cake vertically in half and make a sandwich with whip cream and fruit. Use the remaining whip cream and fruits as decoration on top.

*Can bake automatically with the same combinations found on Ingredient List by Size on page 60 (15cm, 21cm [a good balance for 2-layer cake]). 2 pieces of 18cm sized cakes.

*The finishing steps are similar to the sponge cake.

1. Make sponge cake batter (see Ingredient List by Size on page 60) by following steps 1-8 of the sponge cake recipe on page 61.
2. Preheat the oven (Do not put the cooking accessories or food inside).

**Tips for Cutout Cookie**

1. Mix the softened butter and sugar until it turns white.
2. Add the scrambled eggs slowly. Mix well, adding vanilla extract.
3. Sift cake flour and gently mix. Lump together once the flour has disappeared.
4. Wrap and leave in a refrigerated room for at least 30 minutes.
5. Apply a thin layer of butter (not from ingredients) on each Baking tray.
6. Place the dough from step 4 spread the dough out if 5 mm thick by a dough cutter.

**Important Point**

- It expands well by placing something about 5mm thick on each end of a rolling pin (such as chopsticks).

7. Cut out with your favorite cutter.

**Important Point**

- Dough that has been cut out can be further stretched and cut out.

8. Space each out on the Baking tray.
9. Preheat the oven (Do not put the cooking accessories or food inside).

**Tips for Cutout Cookie**

- Drawing a pattern on a cookie with icing (20g powdered sugar mixed with less than a 1 teaspoon of lemon juice) is a good idea.
Roll Cake

Ingredients (makes 1)

Sponge cake batter

- Cake flour: 90g
- Eggs: 5 Medium Eggs
- Vanilla extract: A Pinch
- Milk: 2 Tbsp

Whip cream

- Heavy Cream: 200mL
- Sugar: 2 Tbsp
- Vanilla extract, brandy: A pinch
- Fruit of your choice: As needed

Baking paper

1. Apply a thin layer of butter (not from ingredients) on the inside of the Baking tray, then place a baking paper at the bottom which goes slightly above the edges.

2. Put the egg whites in a large bowl, and beat until it forms stiff peaks. Slowly add half of the sugar and continue beating.

   > Important Point
   
   The point is to have the egg whites beaten. Please do so thoroughly.

3. Add the remainder of the sugar to the yolks, and warm both with hot water. Remove when it reaches body temperature and beat until it is white and some lines start to appear (mayonnaise-like consistency).

4. Preheat the oven (Do not put the cooking accessories or food inside).

   - MANUAL COOK ➔ CONVEC OVEN ➔ ENTER
   - 1 tray, PREHEAT ➔ ENTER
   - 170°C ➔ START

5. Combine the egg whites with the yolks and mix with a whisk until smooth.

6. Add the flour by shifting into step 5 in order not to break bubbles and mix by bringing the batter from the bottom until you see no traces of flour. In doing so, as a guideline, move the spatula a little and mix it swiftly so that the powder does not disappear, and if you scoop up the batter with a spatula, it falls like a ribbon, leaving marks for a while.

    > Compared to sponge cake, roll cake has a lower cake flour to egg ratio. The texture will be coarse. If scarce flour is used, also but be careful of the dough becoming sticky.

    > Quickly add vanilla extract and milk, then mix.

7. Pour the batter into the Baking tray from step 1, smoothing out the surface and removing air.

8. When preheating is complete, put the Baking tray prepared in step 7 in the oven. Set the knob to 18-20 min. and press START.

9. After cooking, leave step 7 on the baking paper and take it out from the Baking tray and let it cool down.

10. Make whip cream (as shown in step 13 on page 61) and mix the chunks of fruit.

11. Turn the cake over, removing the baking paper. Turn it back over again, placing it on the baking paper, spread on cream and roll.

   > If you are worried about the hardness of the outer circumference, touching the hard parts with a damp cloth will make it easier to roll.

   > By diagonally cutting the cake at the end of the roll by 1cm it will rest nicely with no overlap at the edge.

12. After it is rolled, wrap it in baking paper, and further wrap in plastic. Place the rolled end down in a refrigerated room and let it adjust for about 30 minutes.

   > When baking 2 rolls, after preheating to 170°C with CONVEC OVEN/2 tray/PREHEAT, place the Baking trays on each upper and lower position, and bake for 25-27 minutes. If you are worried about uneven baking, change the shelf position and orientation of the Baking trays when the remaining time is between 8 and 10 minutes.

Variation

- Baking instructions are similar to the "roll cake".

Roll Cake (Cocoa)

Ingredients (makes 1)

1. Sift 80g of cake flour and 20g of cocoa together.

Roll Cake (Matcha)

Ingredients (makes 1)

1. Sift 80g of cake flour and 1 tablespoon of matcha together.

- Egg whites: 6 Medium
- Sugar: 120g
- Egg yolks: 5 Medium Eggs
- Milk: 100mL
- Vegetable Oil: 80mL
- Cake flour: 120g

* The dough may not bake well when the fluorinated pan is not used because it is difficult to stick with the pan.

1. Beat the egg whites until a point forms. Add half of the sugar slowly and beat more.
2. Add the rest of the sugar to the egg yolks, and beat until it begins to whiten.
3. Add milk to the contents of step 2 and quickly mix together. While mixing with a whisk, slowly add vegetable oil.
4. Sift cake flour into the dough of step 3 and mix with a spatula until you see no traces of flour.
5. Preheat the oven (Do not use the cooking accessories or food inside).
   - MANUAL COOK ➔ CONVEC OVEN ➔ START
6. Add 1/3 of the contents of step 1 to the step 4 and mix well with a spatula. Add the remaining batter step 1 and gently mix with a spatula as not to damage the froth.
7. Pour the step 6 into a pan without coating either butter or oil. Pressing the central part with your thumb, hold the pan with both hands and tap it on the table to get rid of air bubbles.
8. When preheating is complete, place on the center of the Baking tray from 7, set the knob to about 40 min. and press START.
9. After baking, turn the pan upside down and let it cool. Once it is completely cooled, use a knife to remove the cake from the pan.

<Tips>

The thickness should be where you can ladle about half the batter, then tilt the spatula and in about 5 seconds it all falls out.

If it gets to this state before putting all of the eggs in, don't add any more.

5 Put water in the water tank.

6 Preheat the oven (Do not put the cooking accessories or food inside).

**14 CREAM PUFF (ADJUST PORTION)**

Choose (14 – 1 tray).

START

7 Lay aluminum foil on the Baking tray. Put the batter in a pastry bag which has a 1cm diameter round tip. Squeeze out 12.

8 When preheating is complete, put the Baking tray from step 7 in the oven. Press **START**.

<Important Point>
They will deflate if cold air enters before they are finished baking, so make sure not to open the door until they are done.

9 Quickly remove from the foil and let cool while the outer layer is still hot. Open the puffs with a knife and stuff with custard cream.

**Tips for Cream Puff**

- The puffiness will vary on how the dough was made. They may not inflate properly if the batter is too soft.

**Eclair**

They're made similarly to cream puffs. However the batter is made in a 10cm long cylindrical shape, and after cooking, the top is cut and 75g of melted chocolate is added then hardens. It is stuffed with custard cream and the top is covered.

Tips for "baking bread"

Ingredients

- Properly measure ingredients
- Inconsistencies can occur when measuring flour with a measuring cup. Please measure with a scale.
- Use dry yeast that doesn't require pre-fermentation. After opening, remove air from package, fold the opening, close it with tape, then store in the refrigerator. Be sure to use quickly. If it is not stored properly or gets old, the bread will not properly rise.
- Adjust proof (fermentation) based on the situation
  - Time required for fermentation differs depending on things like moisture in the room, temperature of the dough, and vitality of the yeast.
  - Fermentation has a setting for consistent steam

Steam proof can be done at 35, 40, or 45°C and proof can be done at 30, 35, 40, or 45°C.

Ingredients (for 1 loaf in a 20x8x8.5cm pan)

- Bread dough
  - Strong flour: 300g
  - Sugar: 2 Tbsp
  - Salt: 1 Tsp
  - Dry yeast: 1 1/3 Tsp (4g)
  - Milk (room temperature): 210mL

Loaf of Bread
Dinner Roll

Ingredients (makes 24 on 2 trays)

Bread dough
- Strong flour 500g
- Sugar 5 Tbsp
- Salt 1 Tsp
- Dry yeast 2 2/3 Tsp (8g)
- Milk (room temperature) 280mL
- Eggs 1 Large
- Butter, Softened 90g

Egg wash
- Beaten Egg 1/2 egg
- Salt A Pinch

1. Put water in the water tank.
   (Water for both fermentation and baking)
2. Put sifted strong flour, sugar, and salt in a large bowl. Add dry yeast and mix. Add milk then whipped eggs in order lightly stir, add softened butter and mix.
3. Clump the dough together and slap one down firmly to counter covered with strong flour for about 10 minutes. Knead until the dough evenly becomes as soft as an earlobe.
   **<Important Point>**
   If the dough is not kneaded enough, the gluten (protein found in flour) film which envelopes the air will be insufficient, air will pass through and it will not properly rise.
4. Spread out the dough, to where you can just see your fingers through one.
5. Put the dough in a round bowl which has had a thin layer of butter applied and cover with a dry towel. Put it on the Baking tray.
6. Insert the tray from step 5 in the lower position.

7. Release gas by softly pressing the dough. Holding the edges, fold from all four sides of the dough. (Gas released).
8. Cut into 24 small round pieces with a scraper or kitchen knife, wrap, and let rest for about 20 minutes. (Bench time).
9. Flatten the round dough into a tear-drop shape with a rolling pin and roll from the thick end. Space out with the end of the roll face down on both thinly buttered (not from the ingredients) Baking trays.
10. Insert trays from step 9 into the both upper and lower position.

**<Important Point>**
The dough will expand to 2–2.5 times its size after secondary fermentation. If it is not fermented enough, add around 10 more minutes of fermentation time while keeping an eye on its condition.
11. Preheat the oven (Do not put the cooking accessories or food inside).

**Variation**

**Sausage Roll**
(24 on 2 trays)

1. Follow the steps 1-10 of the dinner roll recipe.
2. Spread dorure, cut 3 to 4 cm long deep slits in the middle with a razor. Firmly pack 120g round slices of sausages and 85g of mixed vegetables. Cover with 120g of pizza cheese.

**Bread Filled with Red Bean Paste**
(24 on 2 trays)

1. Follow the steps 1-8 of the dinner roll recipe.
2. Shape the bread into a cylindrical shape and wrap 24 portions of coarse sweet red bean paste (600g). Wrap tightly so the sweet red bean paste will not fall out.
   **<Important Point>**
   If a hole remains after putting flour on your finger and pressing the center, it is properly fermented. If the hole closes up, it is not fermented enough. While keeping an eye on its condition, add around 10 more minutes for the fermentation.

- Before baking, sprinkle with poppy seeds, sesame seeds, or cherry blossom petals, if you like.
**Variation**

**Boule**

1. Divide into 4 equal parts after the first fermentation, roll them into round shapes, and firmly pinch the ends of the dough together. Form a # with the cut edges (coupe).

**Coupe**

1. Divide into 4 equal parts after primary fermentation. After shaping into squares, fold 1/3 from the far side to the front, close with the palm of the hand then fold back the left and right corners of the far side to the center. Once again, fold from the far side to the front and firmly pinch the ends of the dough together. Gently roll to adjust the shape. Form a line with the cut edges (coupe).

**Short Memo**

- Simple breads like French breads with lower sugar and fat content are called "lean breads". Conversely, breads like dinner rolls which are prepared with plenty of sugar and butter are called "rich breads". For bread, French bread has a high learning curve and is meant for advanced bakers. It is easy for various influences such as measurements and room temperature to get in the way. Please master these tricks by rising to the challenge many times.
French Bread (Baguette)  
*A baguette is generally considered a thin, cylindrical shape about 65cm long, but here we make it a size that will fit in the Baking tray.

Ingredients (for 2)

- French Bread Flour: 300g
- Sugar: 1/2 Tsp
- Salt: 2/3 Tsp
- Dry yeast: 1 Tsp (3g)
- Lemon Juice: 1 Tsp
- Water (Refrigerated): 185mL

About 2 h. 30 min.

1. Follow steps 2-5 of the dinner roll recipe (page 71) with the ingredients from the list. Wrap the bowl which has the dough.
2. Place the bowl from step 1 on the lower position.
3. Remove the dough to a counter slightly sprinkled with flour. Using both hands press to release gas. Cut in two with either a scraper or a kitchen knife. Lightly fold in two, wrap and let rest for about 20 minutes. (Bench time).
4. Using the palms of your hands lightly tape the dough, then flatten by spreading out into a square. Fold 1/3 from the far side to the front, close with the palm of your hand. Again fold from the far side to the front, press with the palm of your hand, and firmly close the ends. Roll with both hands to about 30cm.
5. Spread the canvas on the Baking tray, and line up the two pieces of dough with space in between. Loosen the canvas making a groove in the middle. Mist the dough.
6. Insert the tray from step 5 in the upper position.
7. After secondary fermentation remove the dough for each canvas from the Baking tray.
8. Place the dough from each canvas from the Baking tray.
9. Preheat. Put the other Baking tray in the upper position. (Do not insert it with any food products on it)
10. When preheating is complete, take the Baking tray from the upper position and close the door. Lift the fabric under the dough a little, move to the board, place both pieces on the preheated Baking tray with space between them.

Tips for Baking French Bread (Baguette)

- If you do not have flour specifically for baking French bread, it can be created by making a flour mixture that is 8 parts strong flour and 2 parts cake flour and is the measurement indicated in the recipe.
- After kneading the dough, use cold water in order to prevent the dough from reaching room temperature. When cooking in summer, prepare everything in a cool room and use chilled ingredients.

Fermentation & What to Watch For

- Ferment the dough in a slightly cool room. The ideal temperature is about 20-30°C
- The dough will expand to 2-2.5 times its size after the first fermentation. If a hole remains after putting flour on your finger and pressing the center, it is properly fermented. If the hole closes up, it is not fermented enough. While keeping an eye on its condition, add around 10 more minutes of fermentation time.

Handling the Dough

- French bread is one of the sensitive types of bread and do not touch the bread dough too much to avoid damaging the dough and uneven browning finish.
- Cover the dough from drying during the time of first fermentation and raising.

Baking

- The way to ensure that your bread has that unique French bread crisp and sheen is to make sure that there is hot steam in your oven.

Ingredients

- French Bread Flour: 300g
- Sugar: 1/2 Tsp
- Salt: 2/3 Tsp
- Dry yeast: 1 Tsp (3g)
- Lemon Juice: 1 Tsp
- Water (Refrigerated): 185mL

Warning

Use a kitchen mitten when removing the hot baking tray after preheating and place on heat-resistant space.

11. Cut 3 pieces (coupe) each with a razor and return to the upper position. Set the knob for 28-30 min. and press START.

After 5 minutes to the next step.

Replace the baking tray of the front and back at the time of 10 minutes remaining.
**Pizza (Regular)**

Ingredients (for 2 25cm pizzas on 2 trays)

- Pizza dough:
  - Strong flour: 160g
  - Cake flour: 80g
  - Sugar: 1 1/2 Tsp
  - Salt: 1 tsp
  - Dry yeast: 3 tsp
  - Water: 140mL

- Shredded Cheese: 200g

Cautions when making pizza

- Cut baking papers so they will not fall off the Baking trays. They can burn if they touch the sides of the oven or are cooked too long.
- After preheating, the Baking trays are hot, so use a mitten when removing them and place them somewhere resistant to heat. (Be careful of burning yourself.)

1. Put water in the water tank. (Water for both fermentation and baking)
2. Do as instructed in steps 2-5 of the dinner roll recipe (page 71) with the ingredients list.
3. Follow steps 6-8 of the dinner roll recipe for primary fermentation, cut into 2 pieces with a scraper or kitchen knife, wrap and let rest for about 10 minutes. (Bench time)
4. Insert Baking trays and preheat. (Do not put any food products in)

**Variation**

- Since cooking accessories are used to preheat, the preheat time is long.

**Variation**

- Cooking instructions are similar to the Pizza (regular) recipe.
